

MotionEngine: Hearables

› Main Product Features:

- Activity classifiers seamlessly track your daily exercise and movement, whether walking, running, biking, on a vehicle, etc
- In-ear detection conveniently stops music when at least one earbud is taken out, and resumes when both are put back in the ear
- Tap gestures are easy to use over physical TWS buttons

› Feature Demonstration:

- Music stops when you take an earbud out, and plays again when placed back in the ear
- Simple taps on the whole device change the song
- Activity classifiers track Still, Walking, and Running in real time
